AUSTRALIA IMMIGRATION

Visa Categories, Subcategories & Visa Subclass Codes — Points 1 to 23

Database planning reference — category and subcategory codes are suggested website taxonomy codes; subclass numbers and visa titles are Australian immigration classifications.

Important accuracy note: This PDF consolidates the 1–23 sections from the preceding chat answer. It is a working taxonomy, not a certified exhaustive government register. Some entries are legacy, repealed, restricted, historical, or require correction/verification. In particular, verify each subclass and its current application status against the Department of Home Affairs before publishing or accepting applications.
